

ENVIRONMENTAL POLICY

Due to the nature of the Erca Wilmar Cosmetic Ingredients Sp. z o.o. business, based on producing organic chemistry products for the cosmetic, textile and construction industries, we are aware of our environmental impact.

The main goal of our company's environmental policy is to ensure compliance with legal requirements and to minimize environmental impact through:

- rational management of raw materials, packaging, water, electricity and gas consumption;
- implementing practices that limit the use of the environment;
- monitoring the environmental impact of the company:
 - degree of purity of discharged production wastewater
 - media consumption
 - amount of generated waste
 - noise emission
 - amount of pollutant emissions introduced into the air, mainly related to production technology and fuel combustion
- raising environmental awareness among employees by integrating them into projects and tasks to protect the environment;
- minimization of waste generation, appropriate segregation, storage and recycling;
- a management system for hazardous chemicals in terms of supply, storage, production use and transport;
- develop the rules for preventing and combating the effects of industrial breakdown that may affect the environment;
- search and use of available techniques taking into account economic and pro-environmental solutions during the launching of investment or modernization activities.

Erca Wilmar Cosmetic Ingredients is committed to:

- successively act to minimize the impact on the environment, continuous improvement in this area, take the initiative to protect the environment and strengthen our green image;
- comply with Polish legislation and European standards for environmental protection;
- share information about our pro-ecological activities with customers, employees and other interested parties.
